Methodology & Sources

WHAT THIS DASHBOARD ANSWERS

Which origins account for the largest displaced populations?
How has the mix of refugees, asylum-seekers, and IDPs changed?
Which crises are primarily internal versus cross-border?
Where did displacement rise or fall most recently?

METRIC DEFINITIONS

Refugees: people recognized under IOM DTM SUDAN mandate.
Asylum-seekers: people with pending protection claims.
IDPs: people displaced within their country.
Total displaced: refugees + asylum-seekers + IDPs + other people in need.

DATA FOUNDATION

Source: IOM DTM SUDAN Refugee Population Statistics API
Grain: origin × year
Coverage: 18 STATES · 185 LOCALITIES, 30 JUN 2026
Rows: 220 origin-year observations
Indicators: refugees, asylum-seekers, IDPs, other people in need

INTERPRETATION GUARDRAILS

IOM DTM SUDAN figures can be provisional and revised. Reporting completeness varies by country and population type.
The dashboard covers the 20 largest origins in 2025, not the full global population.
Displayed totals sum four selected categories and do not replace IOM DTM SUDAN's reconciled global headline.
