Methodology & Sources

WHAT THIS DASHBOARD ANSWERS

Which states carry the largest IDP and returnee caseloads?
How are IDPs and returned individuals distributed across localities?
Where do return movements exceed or lag current IDP caseloads?
Which localities show the greatest combined displacement pressure?

METRIC DEFINITIONS

IDPs: individuals displaced within Sudan at the reporting date.
IDP households: reported households containing IDPs.
Returned individuals: people reported as having returned to an area of origin.
People represented: IDPs + returned individuals; not a cumulative or unique-person total.

DATA FOUNDATION

Source: IOM DTM Sudan, IDPs and Returnees Snapshot 007
Grain: locality within state; single-date snapshot
Coverage: 18 states · 185 localities · 30 Jun 2026
Rows: 185 locality observations
Indicators: IDPs, IDP households, returned individuals

INTERPRETATION GUARDRAILS

IOM DTM Sudan figures are operational estimates and may be revised as verification and access conditions change.
This is a single snapshot dated 30 June 2026; it does not measure historical trends or cross-border displacement.
Totals aggregate reported locality values. IDPs and returned individuals are distinct operational
